Esther Trilken (s3999467)

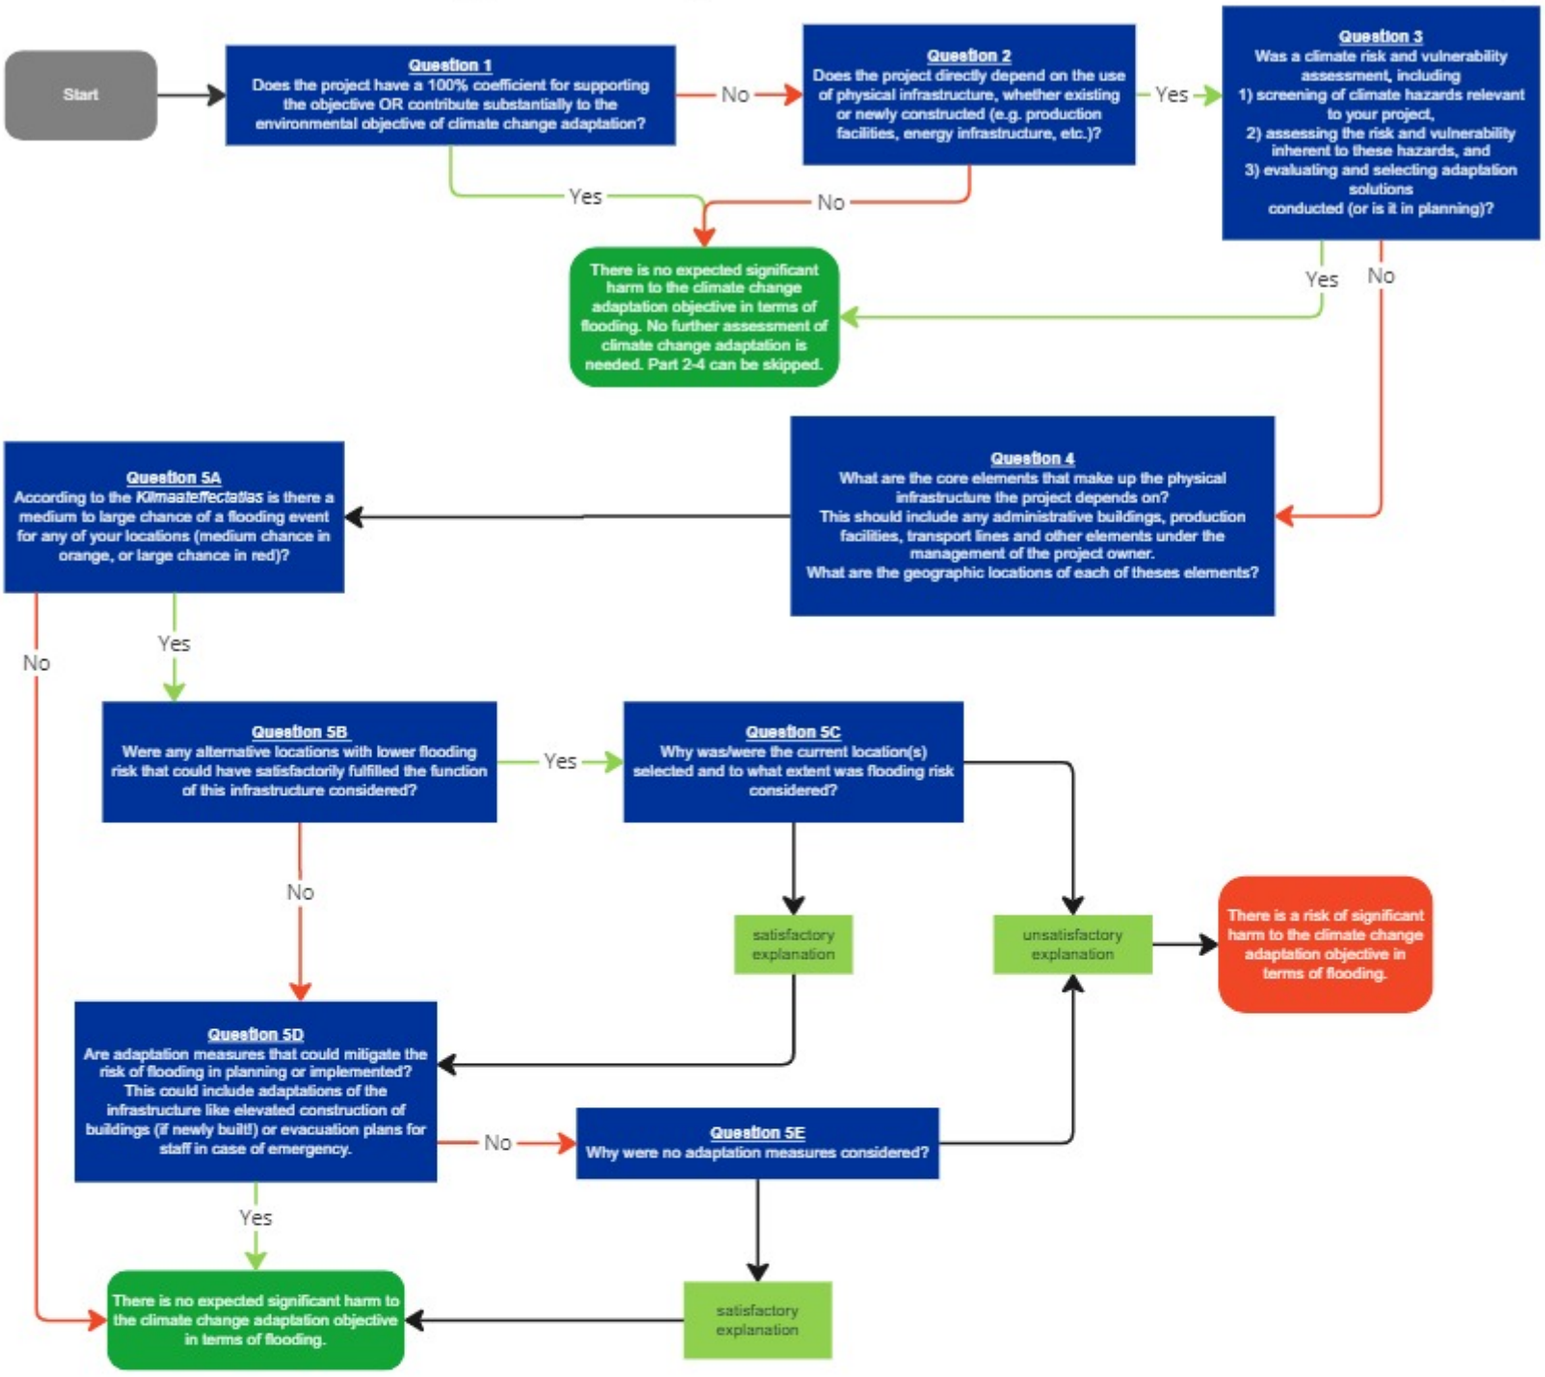

Table of Contents

Climate Change Mitigation 2
Climate Change Adaptation: Part 1 - Flooding 3
Climate Change Adaptation: Part 2 – Drought 3
Climate Change Adaptation: Part 3 – Waterlogging 4
Climate Change Adaptation: Part 4 – Heat stress 4
Climate Proofing 5
Sustainable Use and Protection of Water and Marine Resources: Part 1 – Water Resources 6
Sustainable Use and Protection of Water and Marine Resources: Part 2 – Marine Resources 8
Circular Economy 9
Pollution Prevention and Control 11
Protection and Restoration of Biodiversity and Ecosystems 13

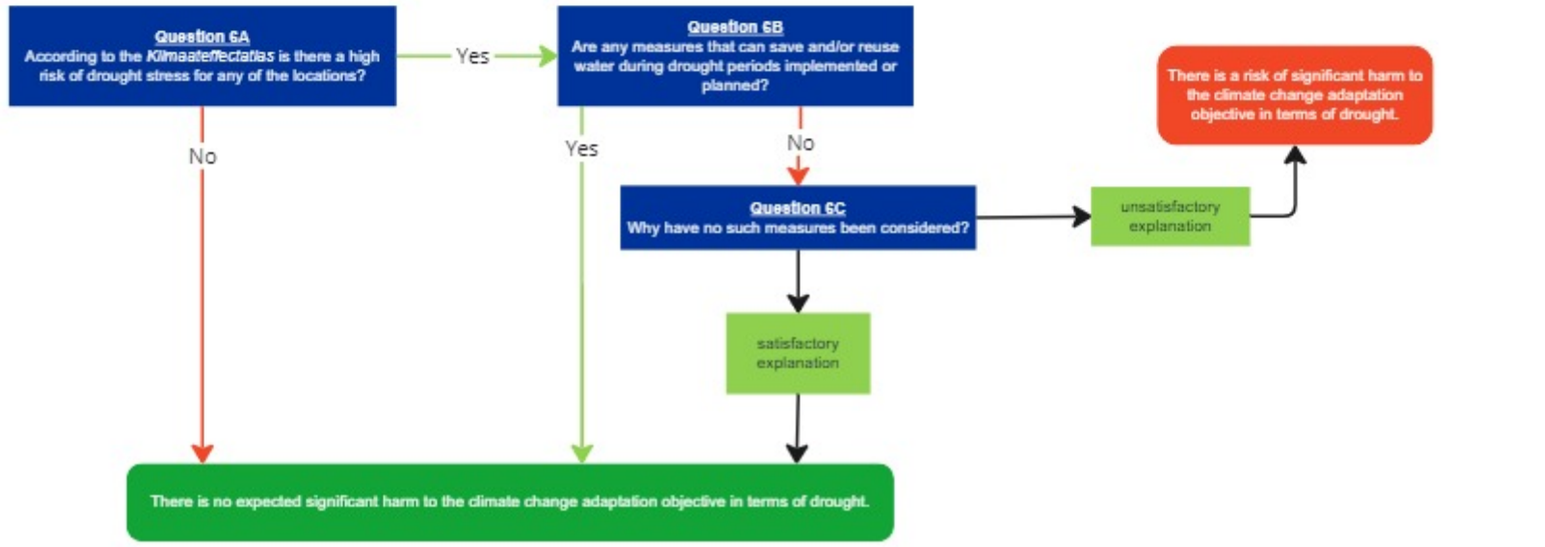

Climate Change Mitigation

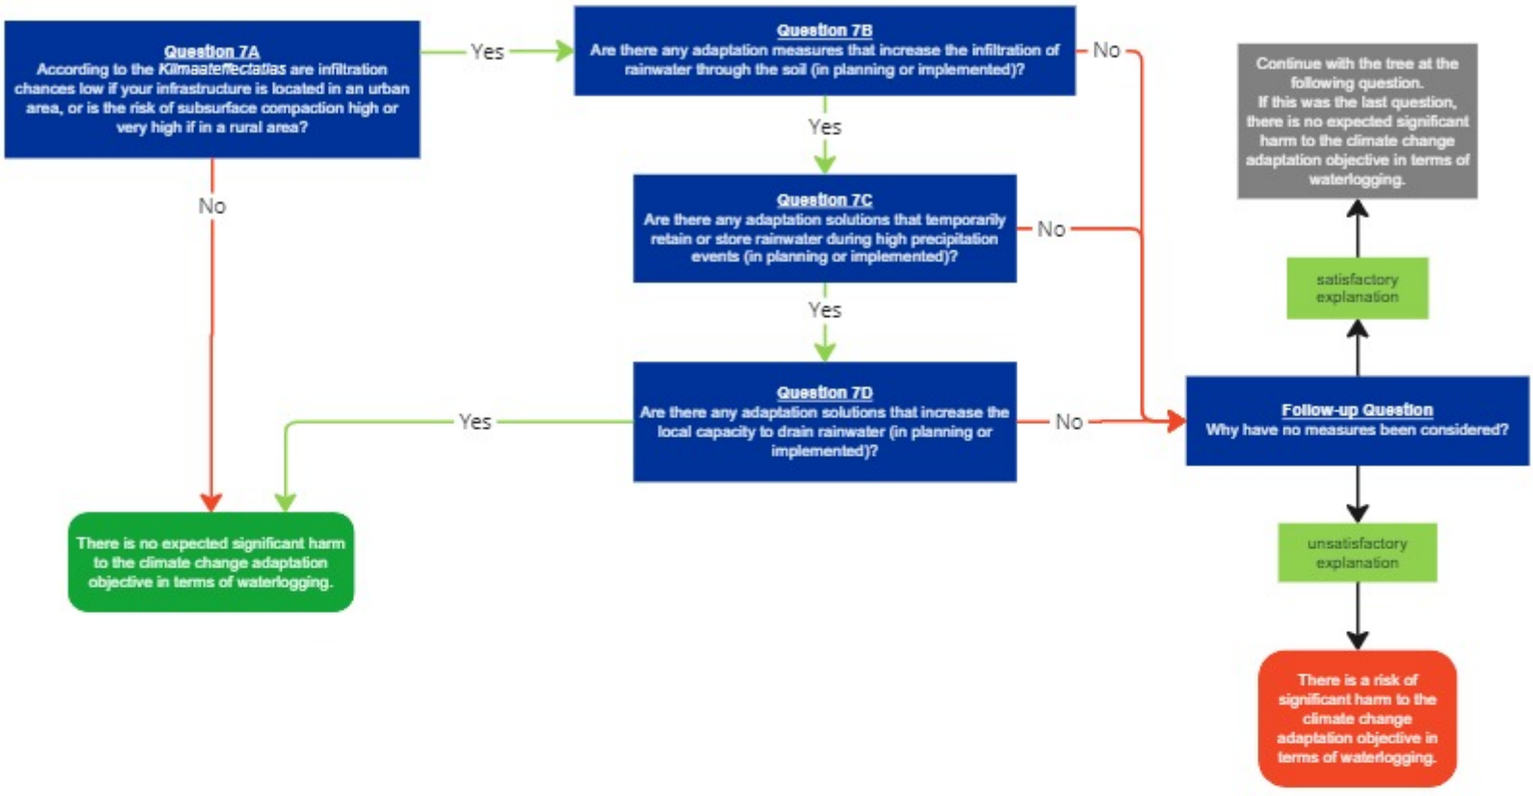

Climate Change Adaptation: Part 1 - Flooding

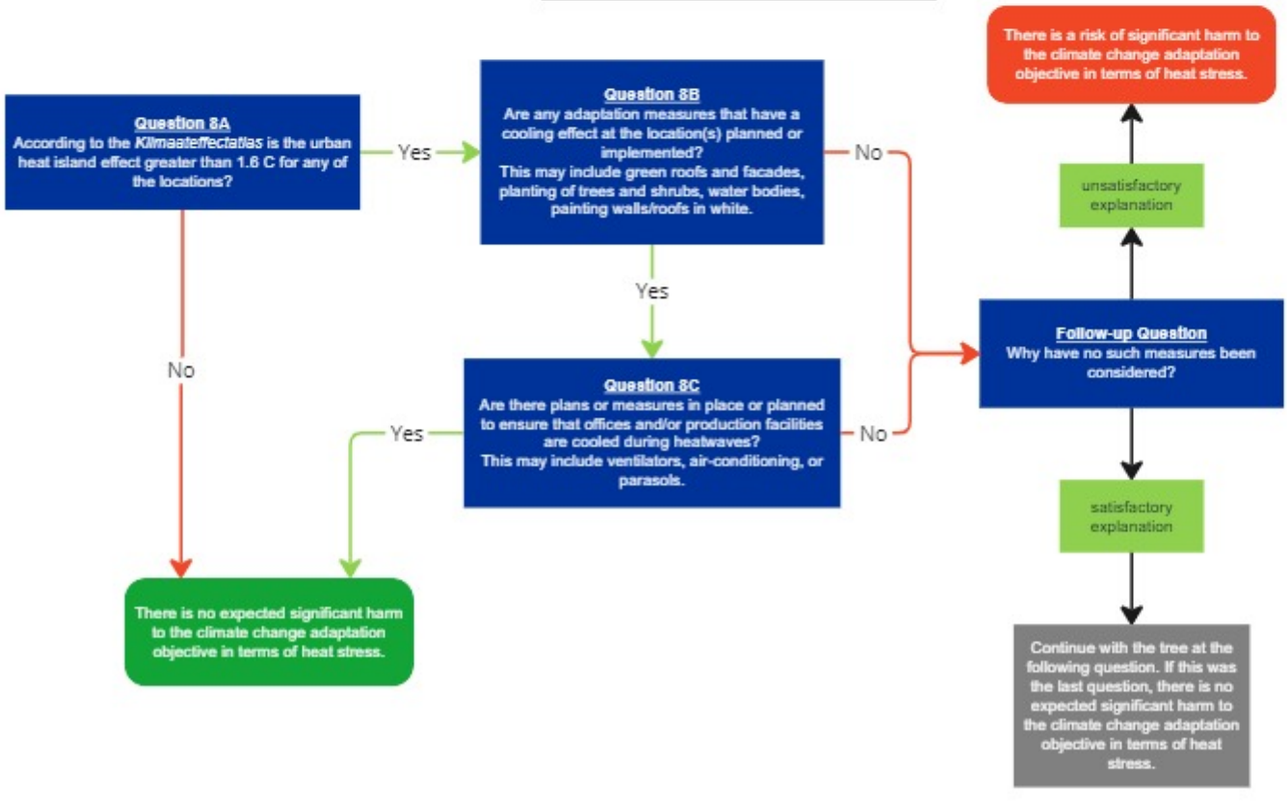

Climate Change Adaptation: Part 2 - Drought

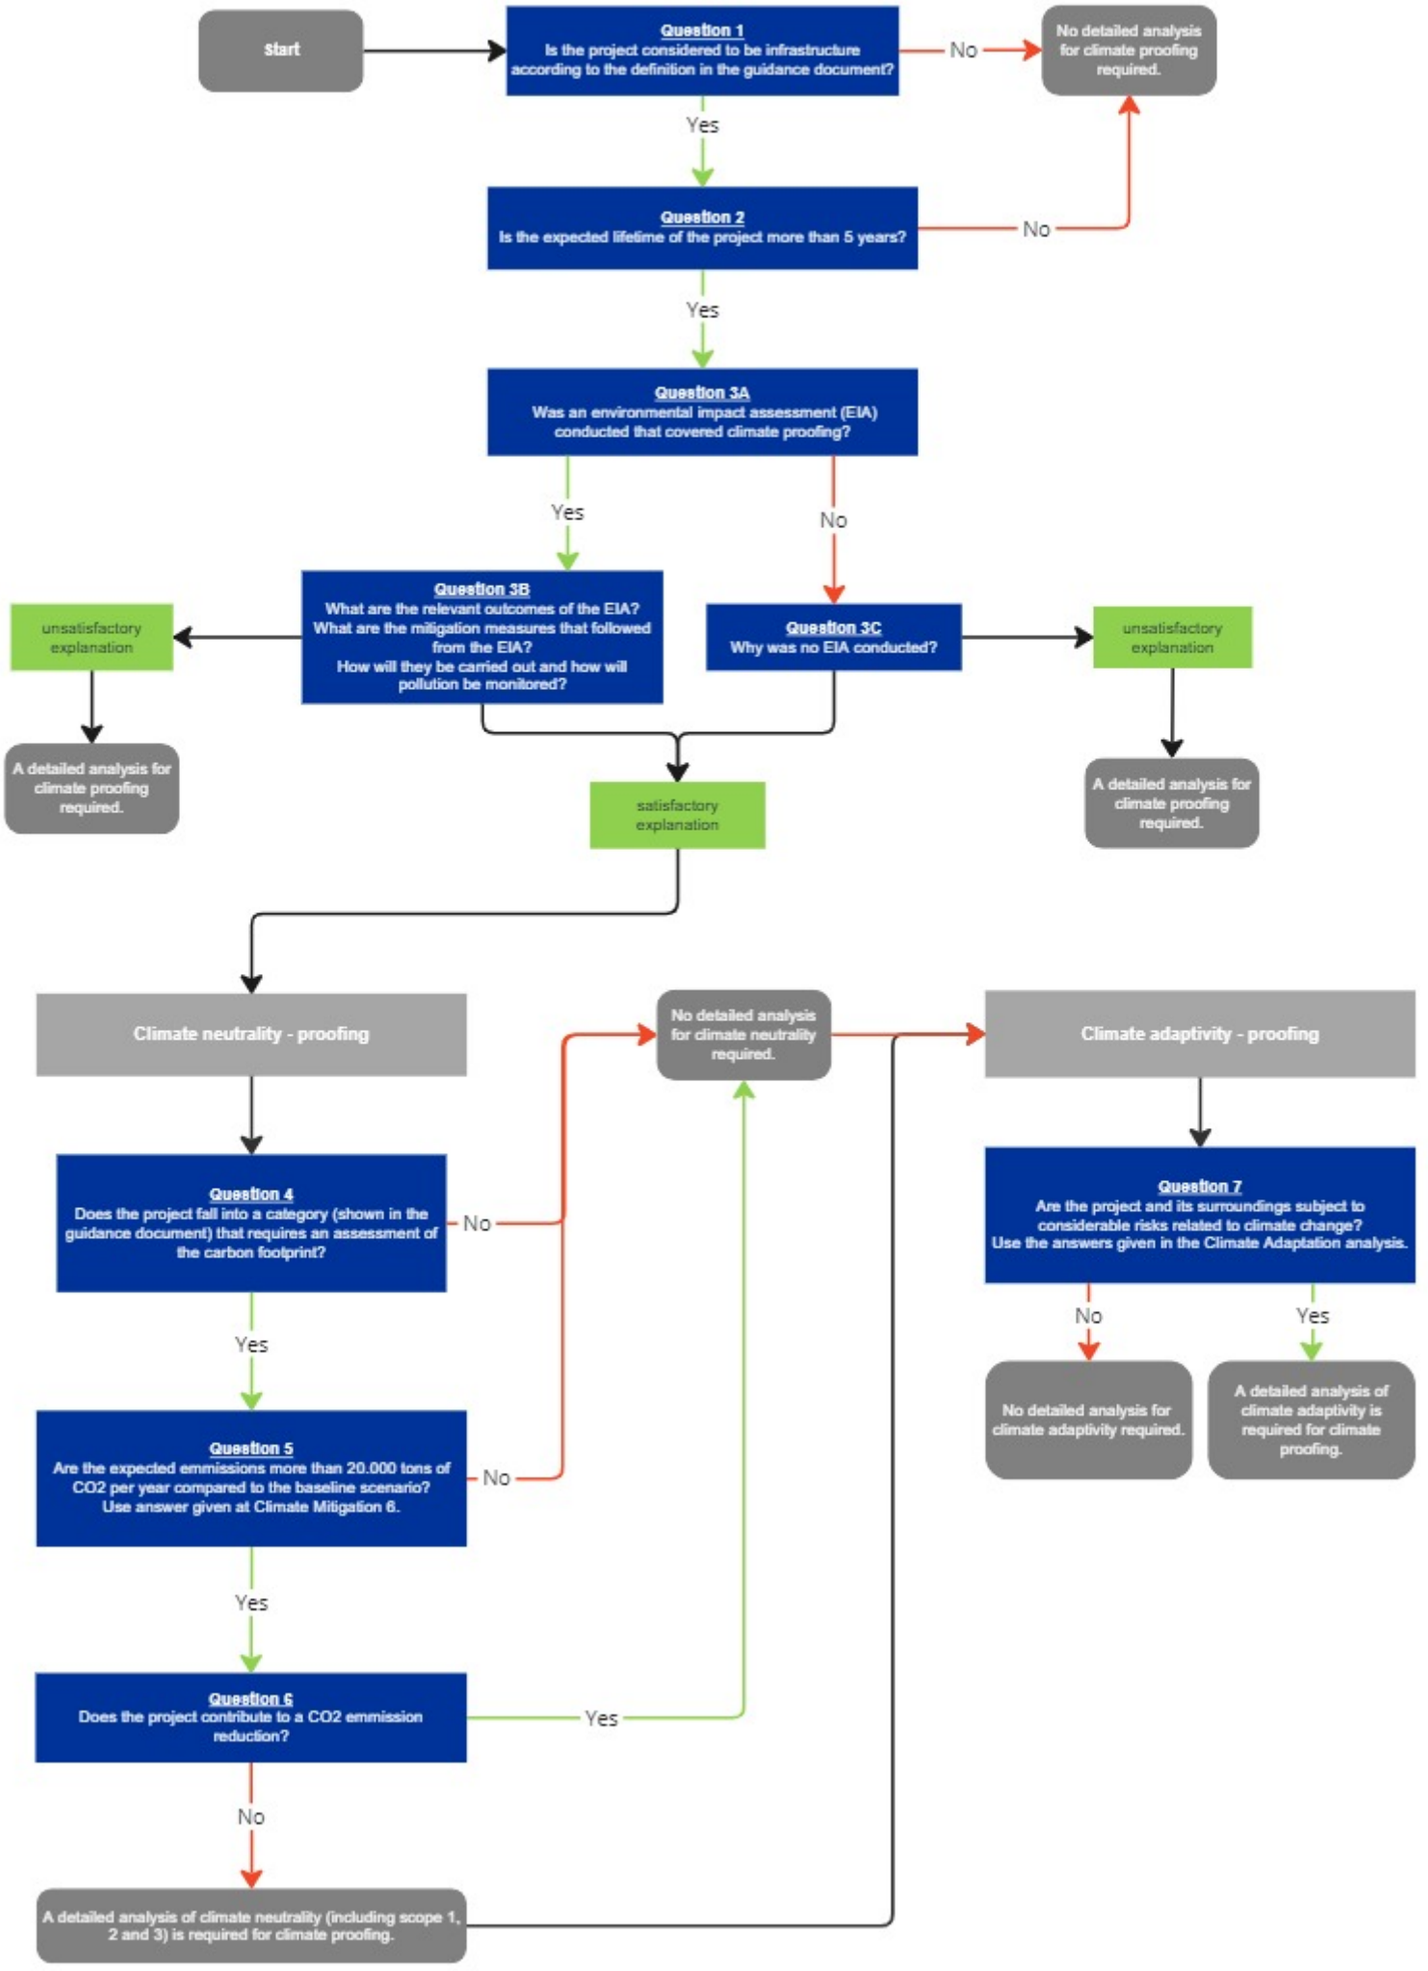

Climate Change Adaptation: Part 3 - Waterlogging

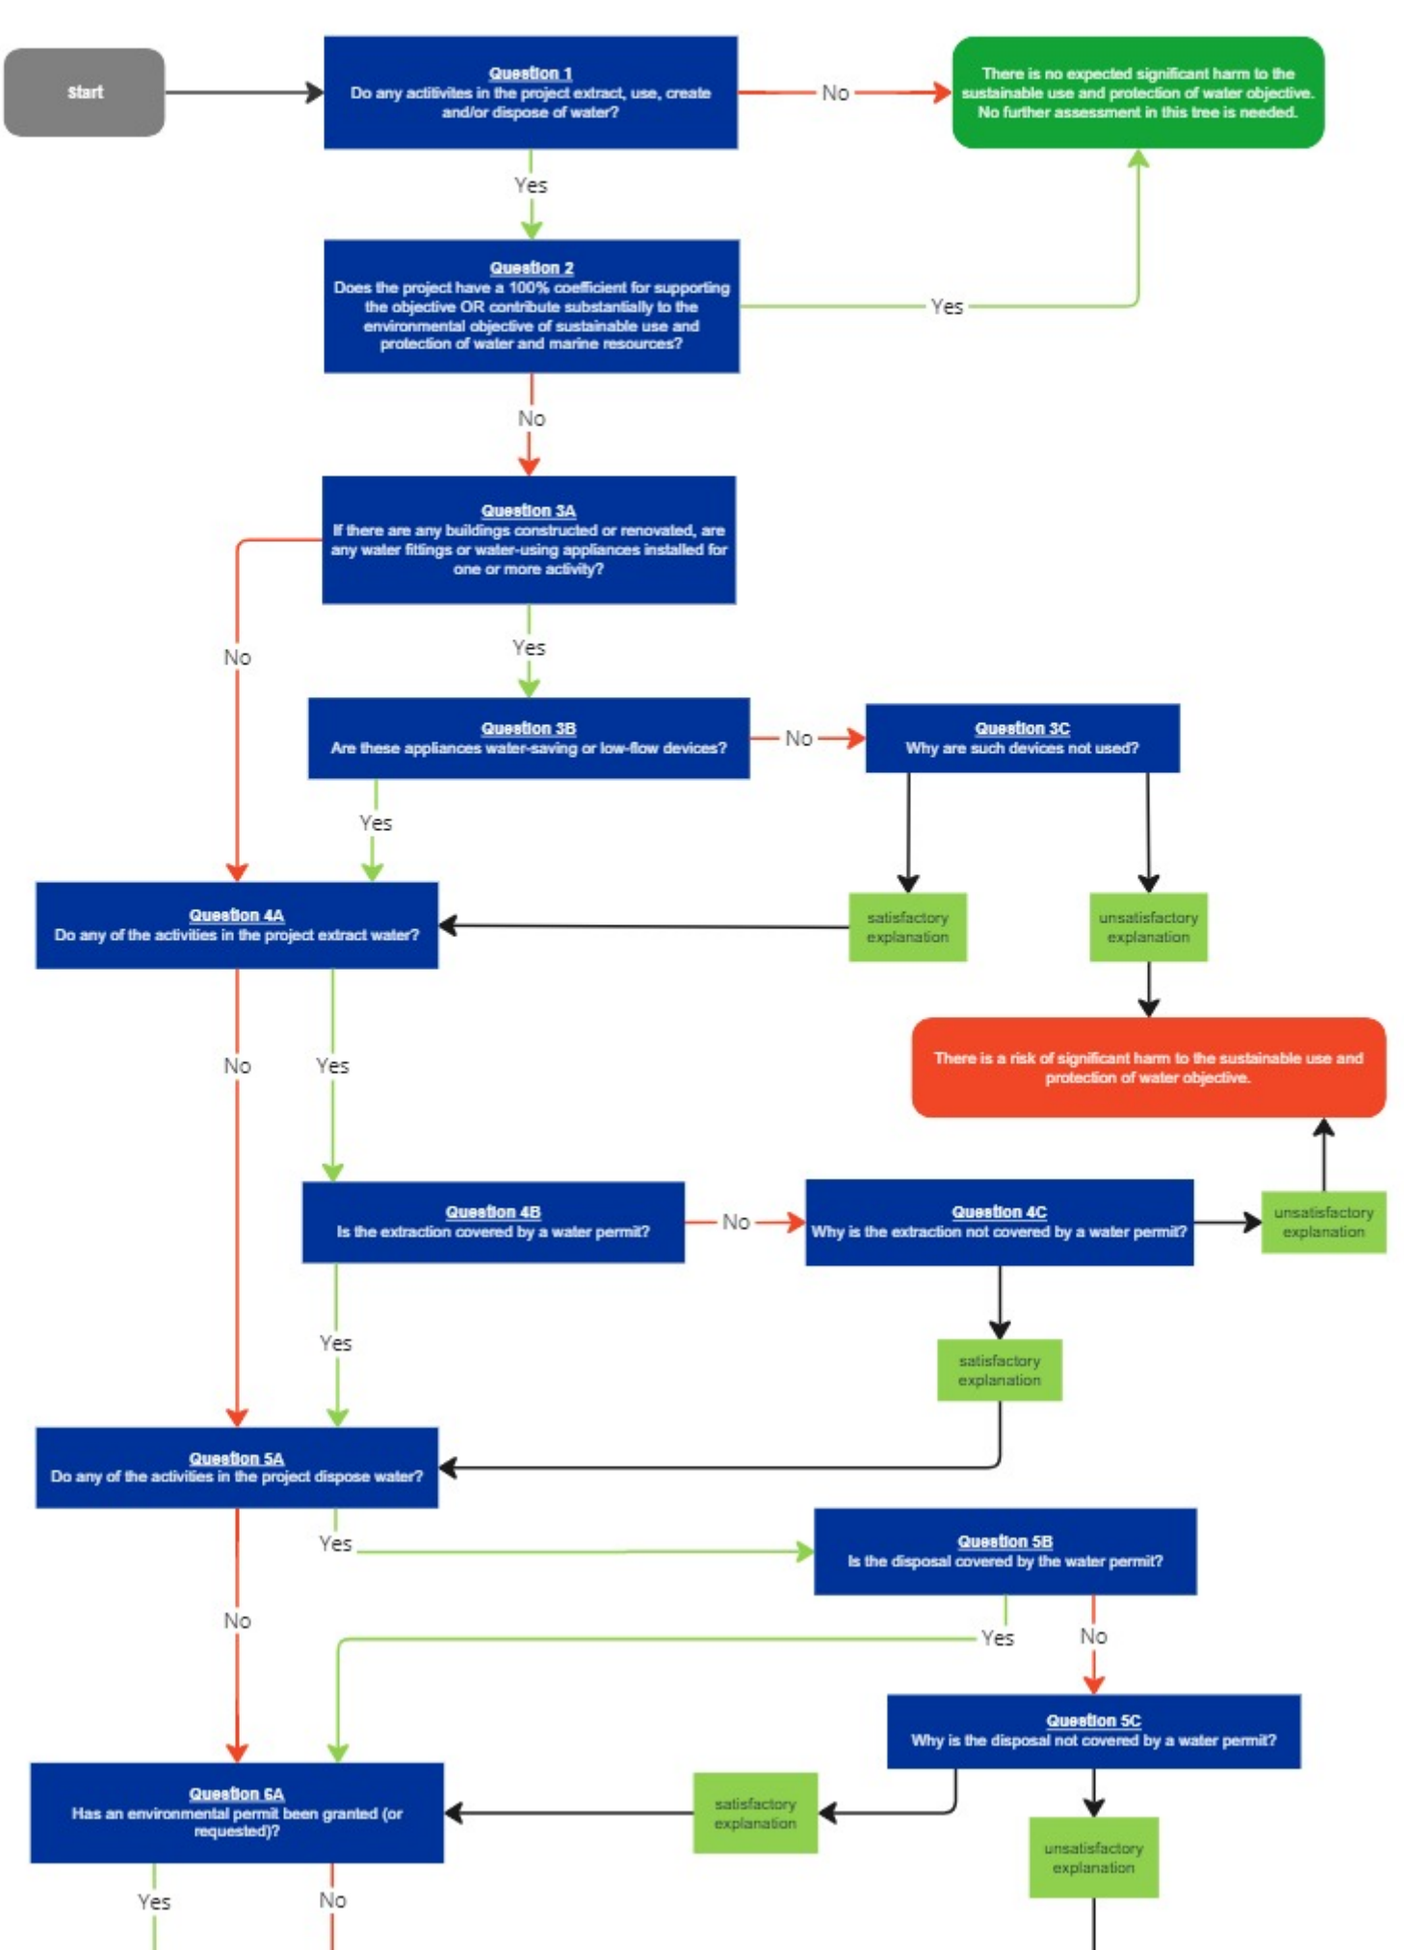

Climate Change Adaptation: Part 4 - Heat stress

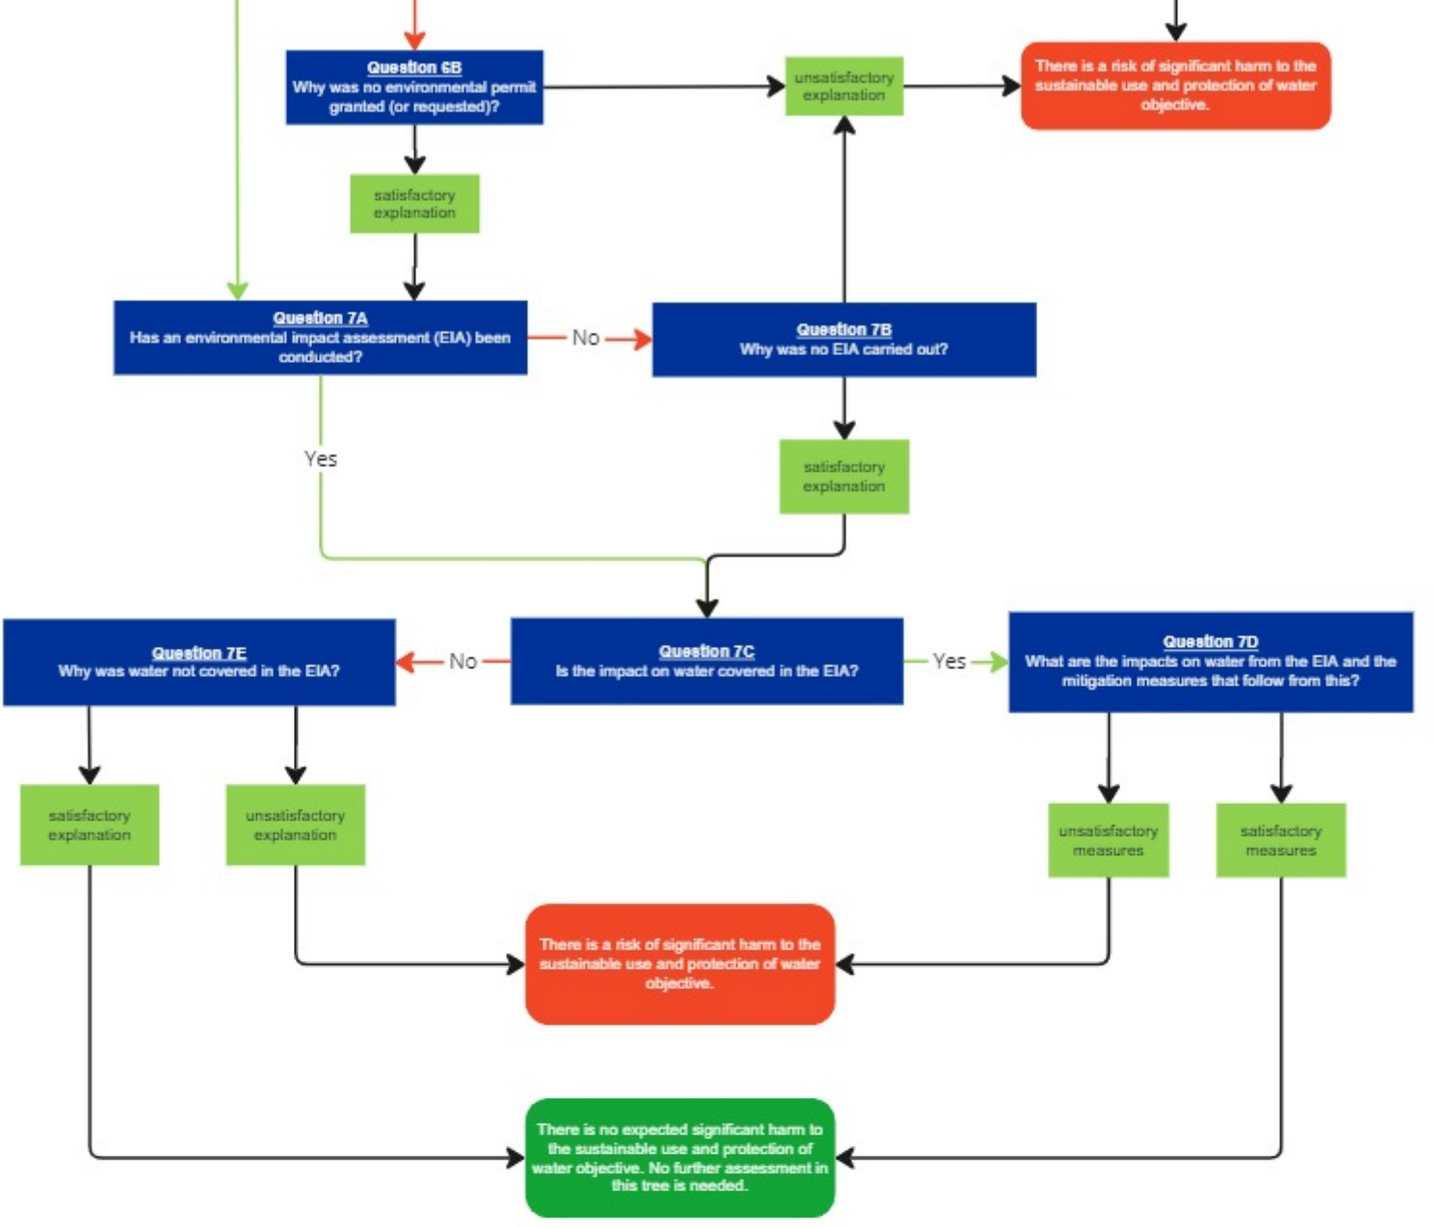

Climate Proofing

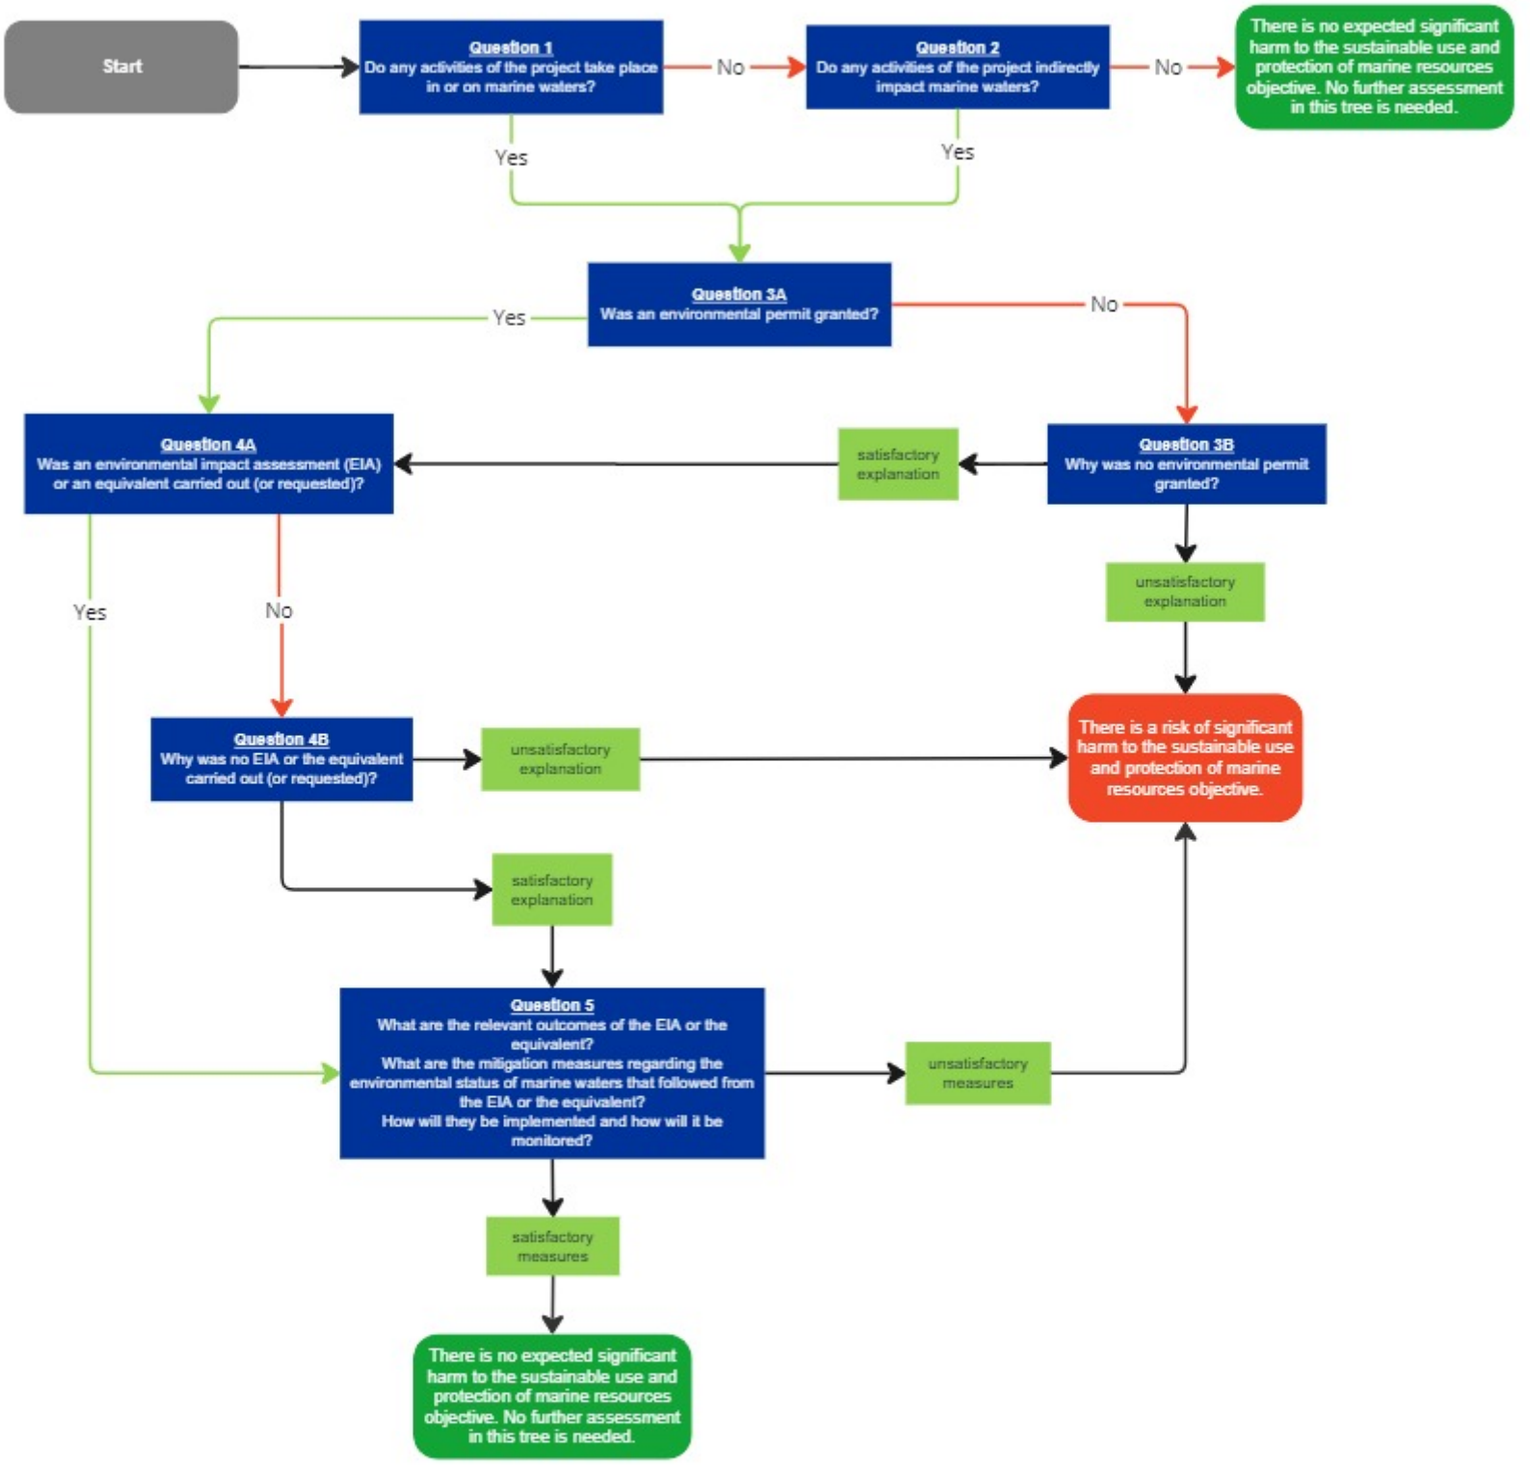

Sustainable Use and Protection of Water and Marine Resources: Part 1 - Water Resources

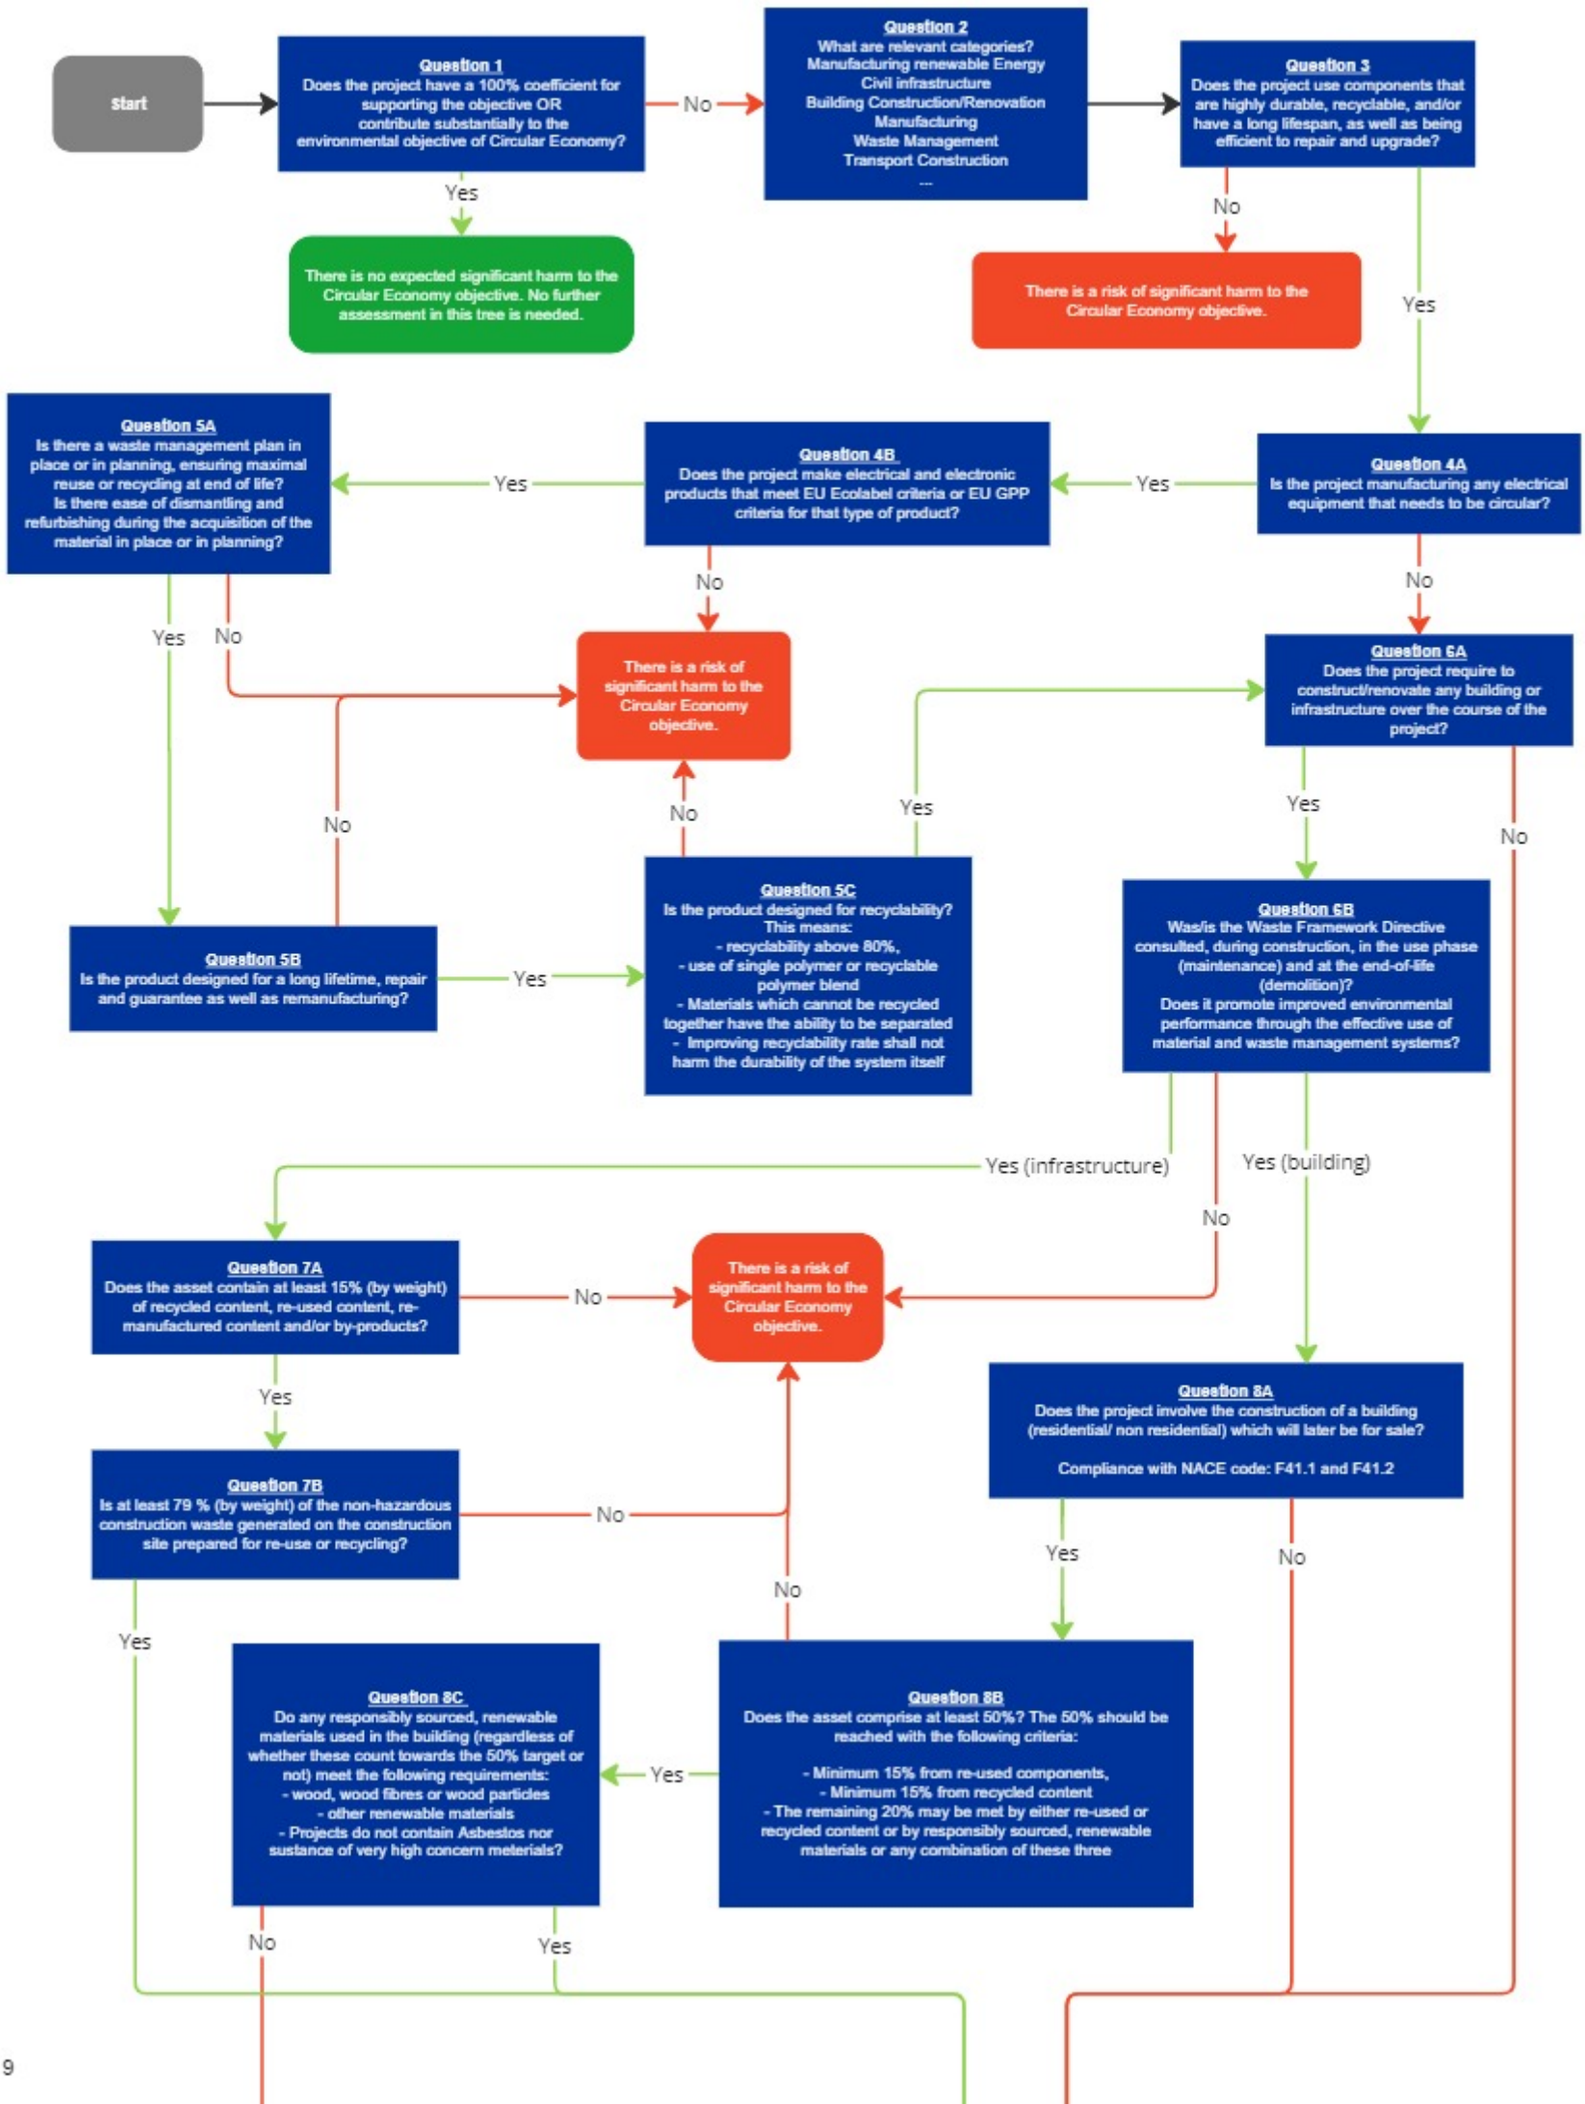

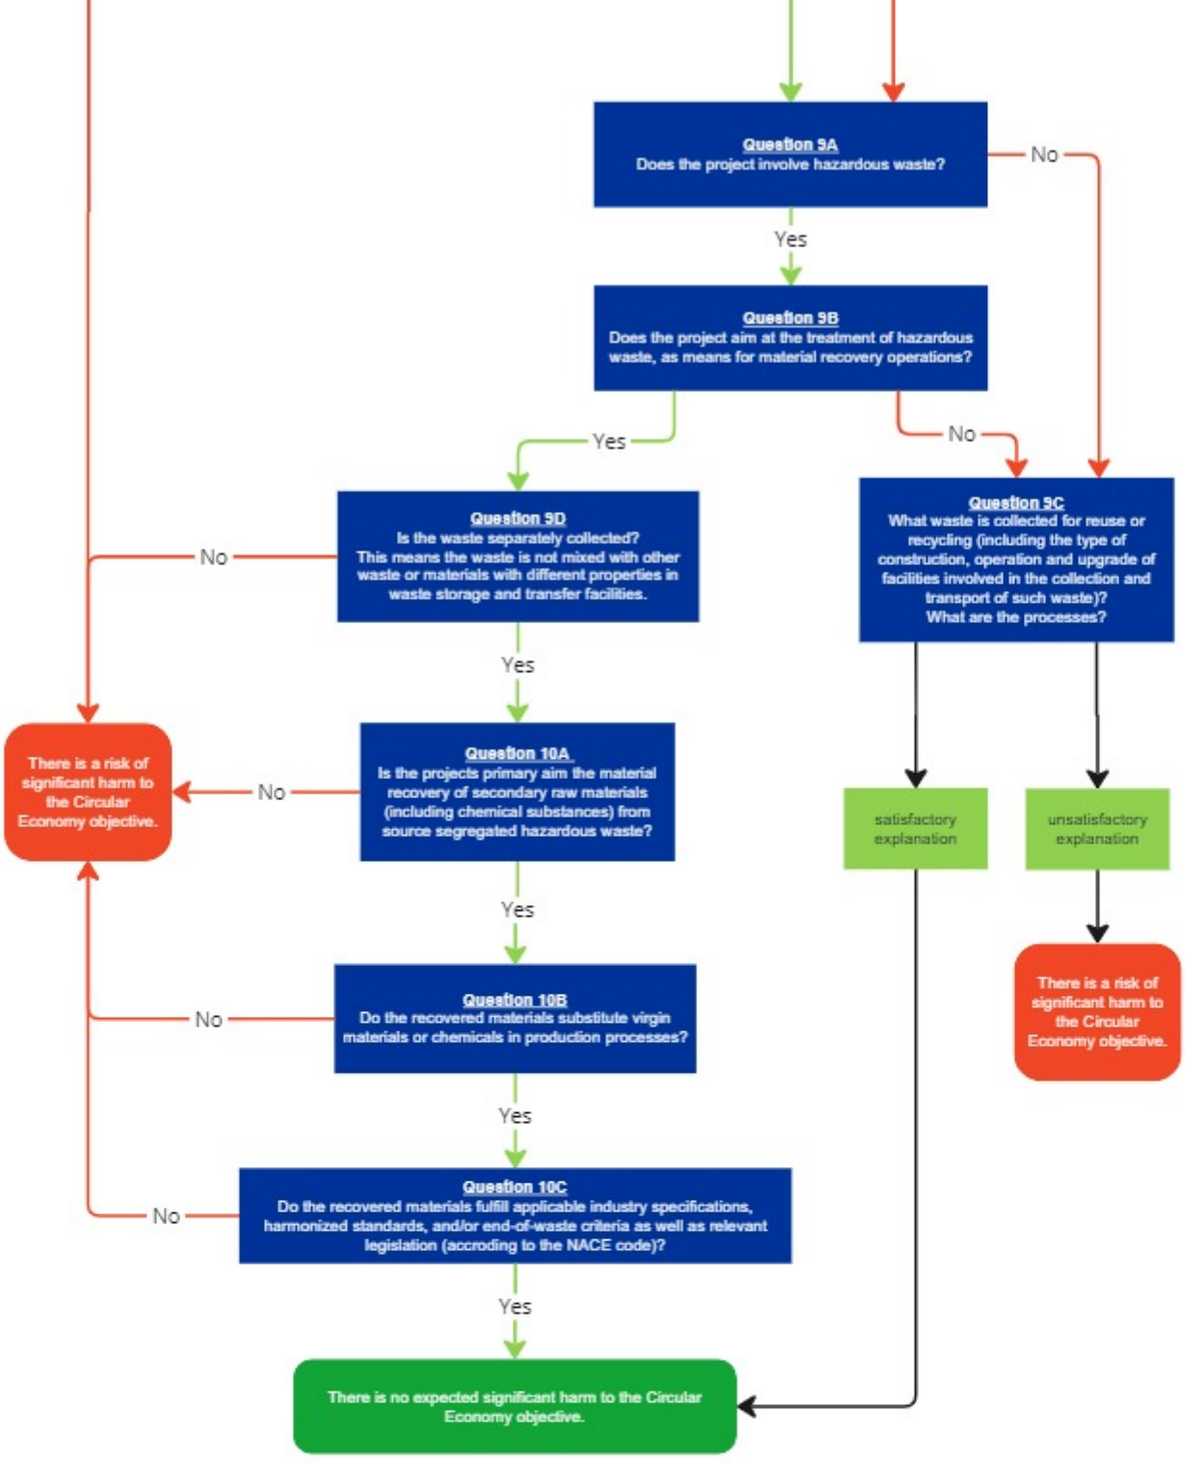

Question 6B
Why was no environmental permit granted (or requested)?
unsatisfactory explanation
There is a risk of significant harm to the sustainable use and protection of water objective.
satisfactory explanation
Question 7A
Has an environmental impact assessment (EIA) been conducted?
No
Question 7B
Why was no EIA carried out?
Yes
satisfactory explanation
Question 7E
Why was water not covered in the EIA?
No
Question 7C
Is the impact on water covered in the EIA?
Yes
Question 7D
What are the impacts on water from the EIA and the mitigation measures that follow from this?
satisfactory explanation
unsatisfactory explanation
unsatisfactory measures
satisfactory measures
There is a risk of significant harm to the sustainable use and protection of water objective.
There is no expected significant harm to the sustainable use and protection of water objective. No further assessment in this tree is needed.

Sustainable Use and Protection of Water and Marine Resources: Part 2 - Marine Resources

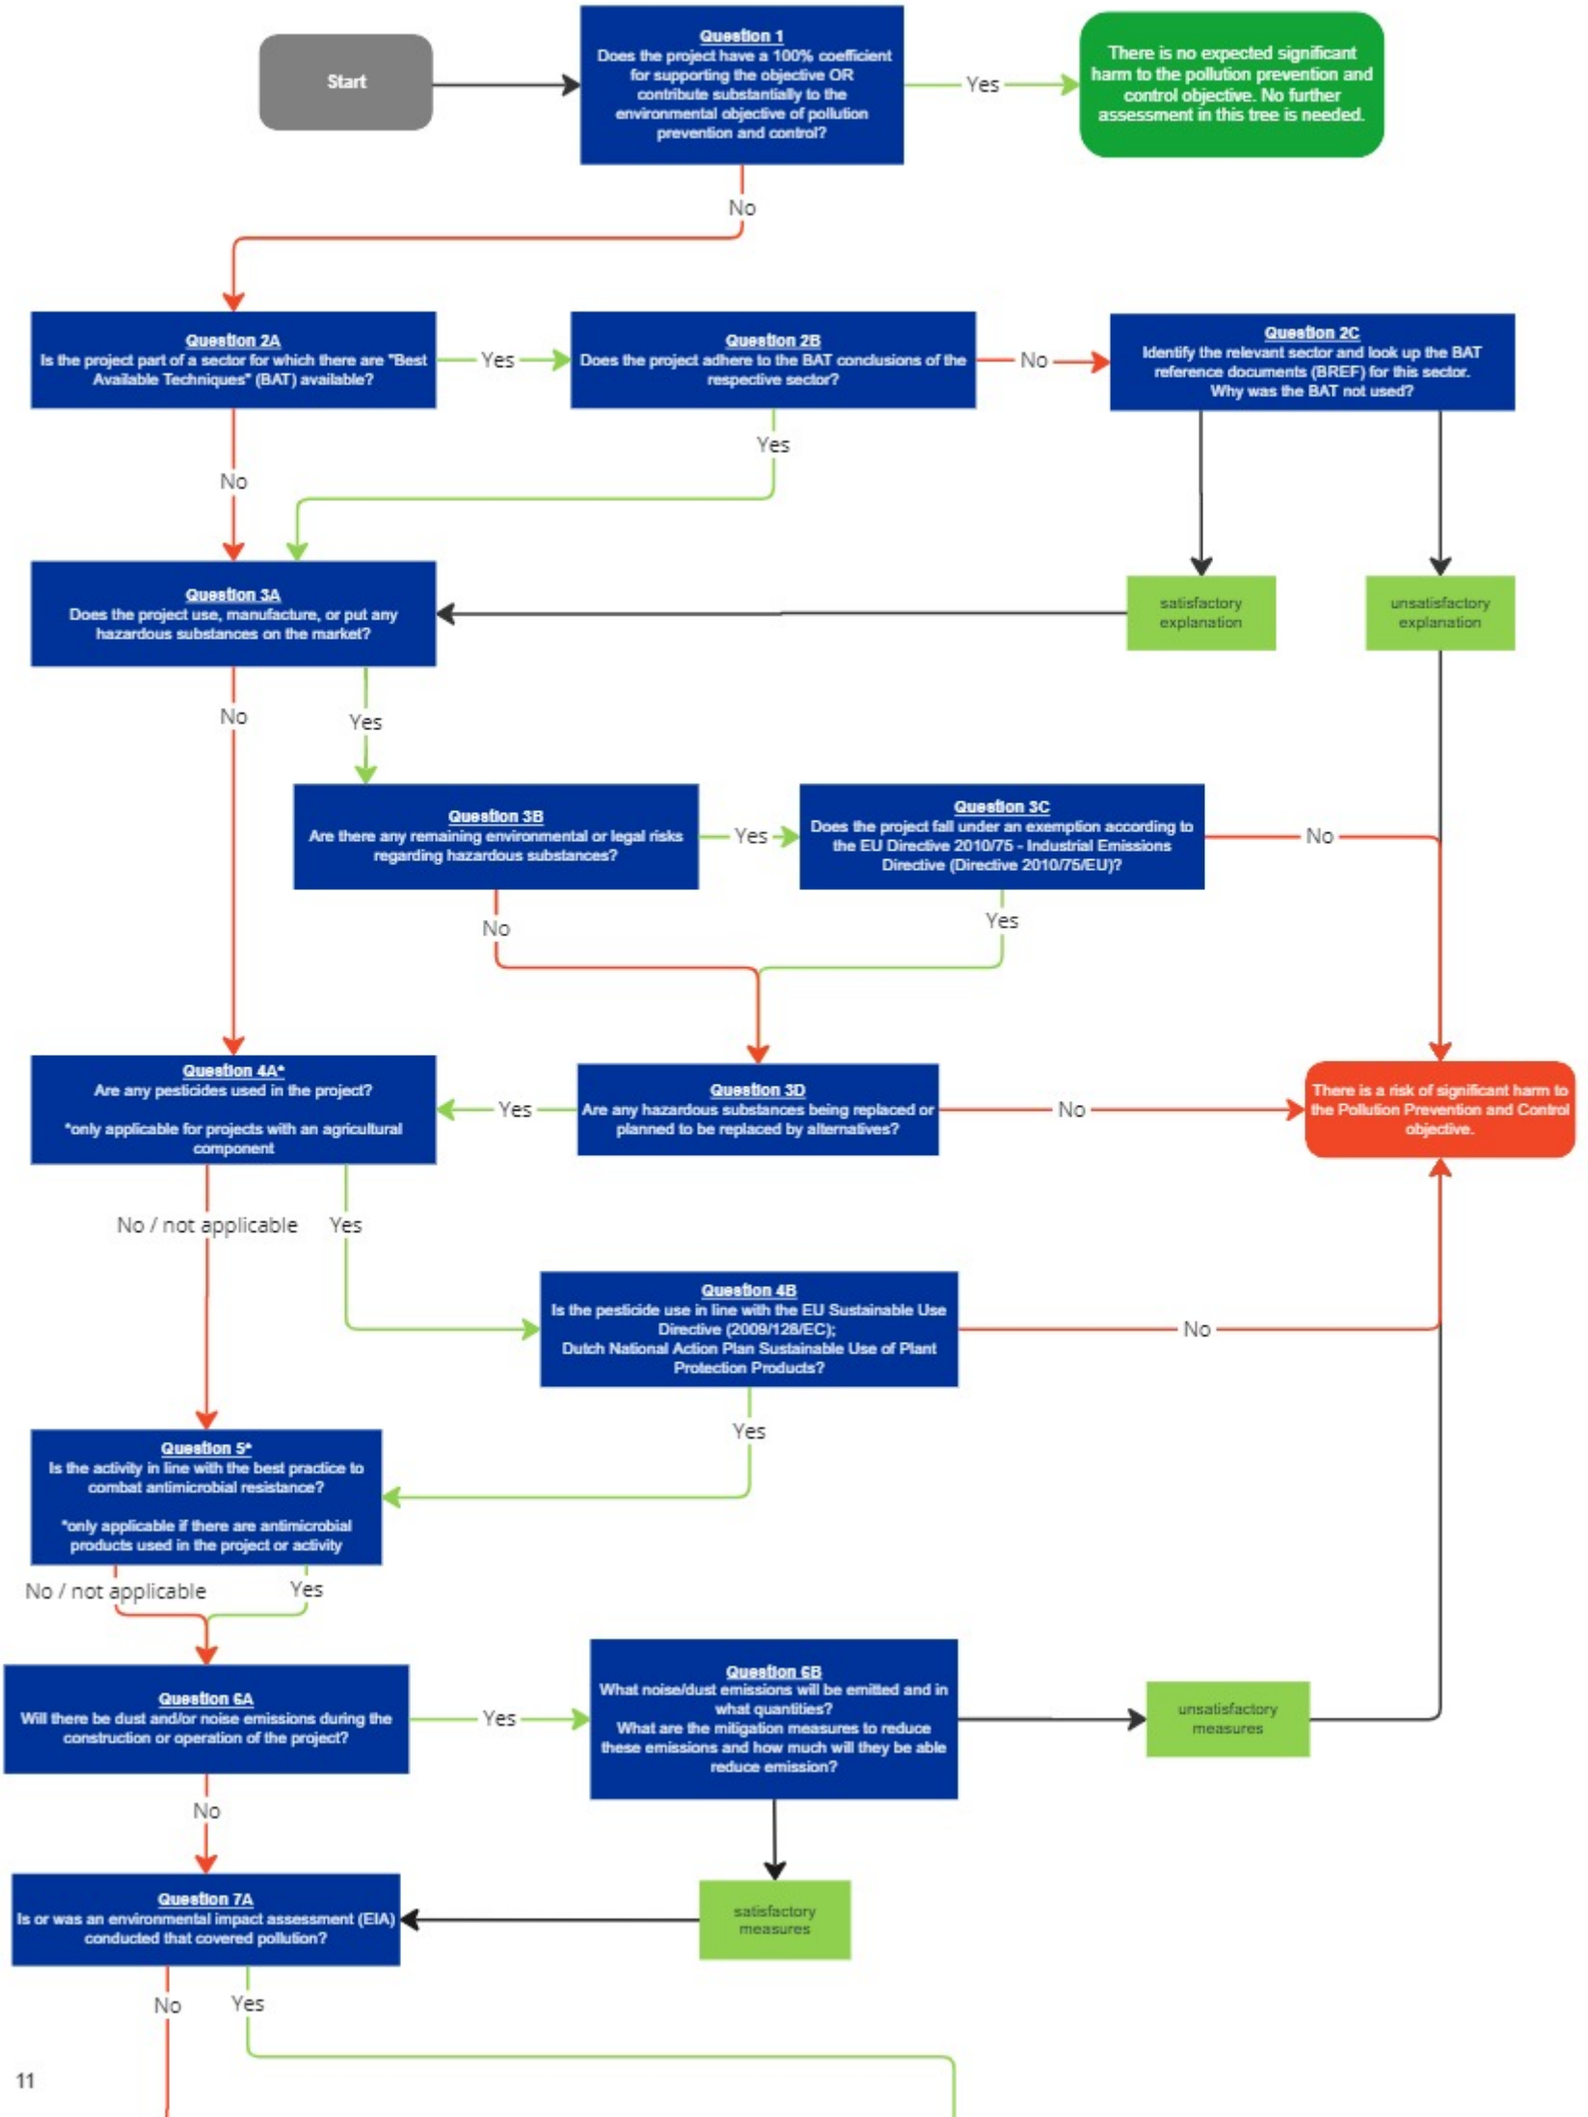

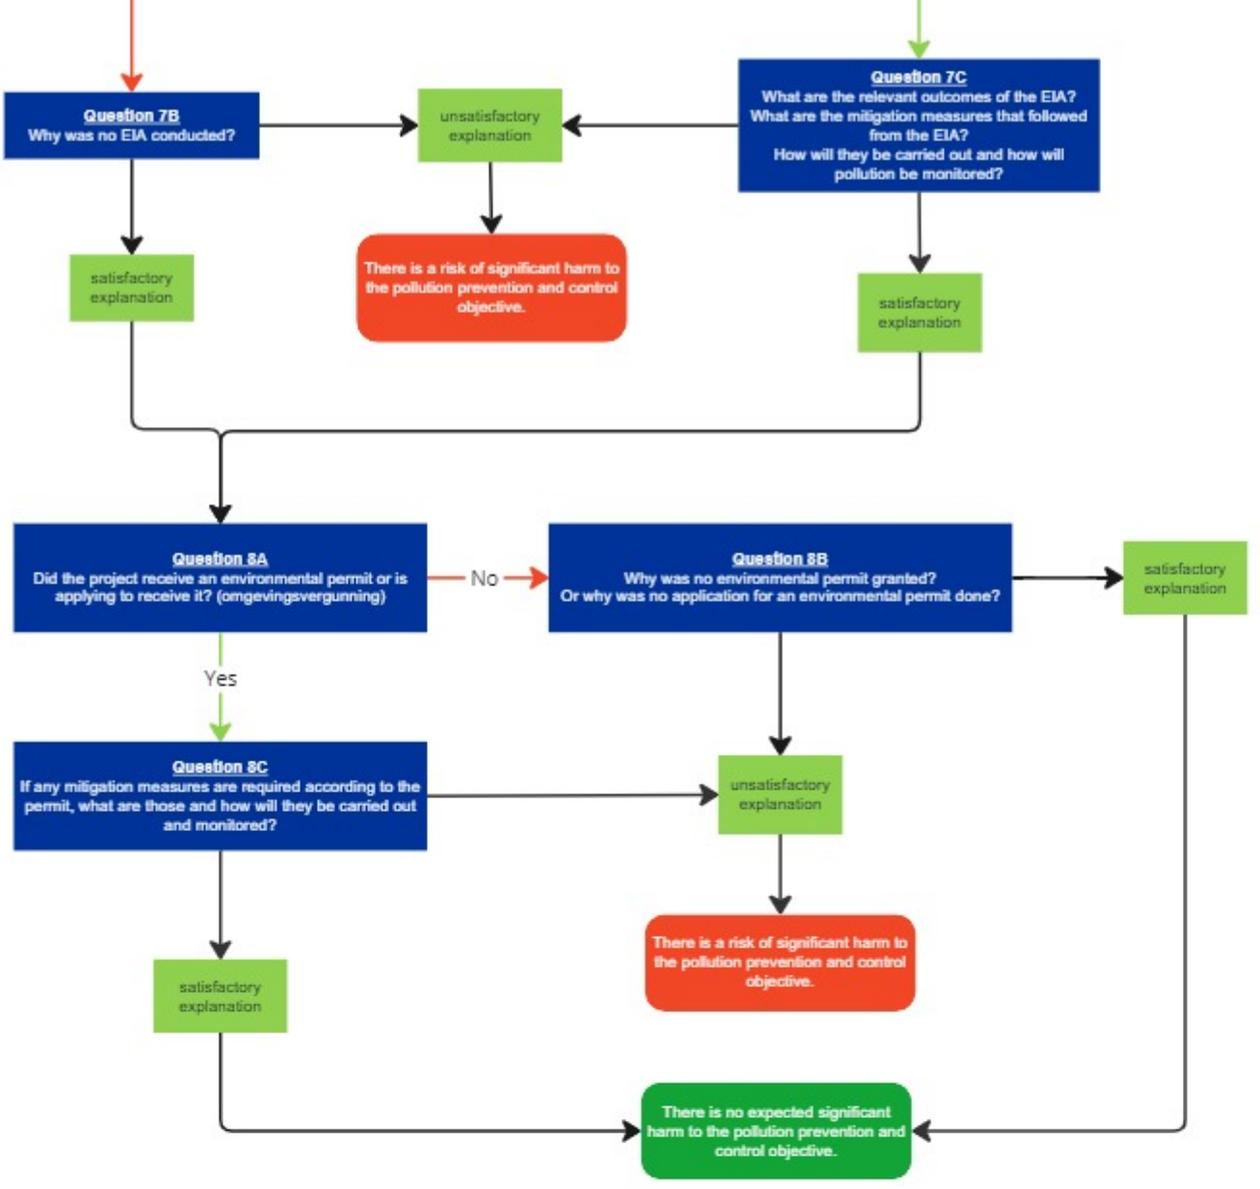

Circular Economy

Question 9A
Does the project involve hazardous waste?
No
Yes
Question 9B
Does the project aim at the treatment of hazardous waste, as means for material recovery operations?
Yes
No
Question 9D
Is the waste separately collected?
This means the waste is not mixed with other waste or materials with different properties in waste storage and transfer facilities.
No
Yes
Question 9C
What waste is collected for reuse or recycling (including the type of construction, operation and upgrade of facilities involved in the collection and transport of such waste)?
What are the processes?
There is a risk of significant harm to the Circular Economy objective.
Question 10A
Is the projects primary aim the material recovery of secondary raw materials (including chemical substances) from source segregated hazardous waste?
No
Yes
satisfactory explanation
unsatisfactory explanation
There is a risk of significant harm to the Circular Economy objective.
Question 10B
Do the recovered materials substitute virgin materials or chemicals in production processes?
No
Yes
Question 10C
Do the recovered materials fulfill applicable industry specifications, harmonized standards, and/or end-of-waste criteria as well as relevant legislation (accroding to the NACE code)?
No
Yes
There is no expected significant harm to the Circular Economy objective.

Pollution Prevention and Control

Question 7B
Why was no EIA conducted?
unsatisfactory explanation
Question 7C
What are the relevant outcomes of the EIA?
What are the mitigation measures that followed from the EIA?
How will they be carried out and how will pollution be monitored?
satisfactory explanation
There is a risk of significant harm to the pollution prevention and control objective.
satisfactory explanation
Question 8A
Did the project receive an environmental permit or is applying to receive it? (omgevingsvergunning)
No
Question 8B
Why was no environmental permit granted?
Or why was no application for an environmental permit done?
satisfactory explanation
Yes
Question 8C
If any mitigation measures are required according to the permit, what are those and how will they be carried out and monitored?
unsatisfactory explanation
There is a risk of significant harm to the pollution prevention and control objective.
satisfactory explanation
There is no expected significant harm to the pollution prevention and control objective.

Protection and Restoration of Biodiversity and Ecosystems
